Division Of Labor

In economics, the new international division of labour (NIDL) is an outcome of globalization. The term was coined by theorists seeking to explain the spatial shift of manufacturing industries from advanced capitalist countries to developing countries —an ongoing geographic reorganisation of production , which finds its origins in ideas about a global division of labor . [1]

Division of labor can also be referred to as
“Production By Specialization”. Many
experts in Economics will tell you that
division of labor is more advantageous
than the situation where a single worker
does the entire production process of a
product all by himself. An example of
division of labor is the production process
in a biscuit factory.
