This chapter explores the transformation of the photographic image through differing conceptual and theoretical lenses including that of the algorithm, "technē", continental philosophy and computer science. It contributes to debates in digital aesthetics, networked cultures and non-representational theory.

~~The Digital Image in Photographic Culture; Algorithmic ...~~

Digital photography uses cameras containing arrays of electronic photodetectors to produce images focused by a lens, as opposed to an exposure on photographic film. The

Online Library The Photographic Image In Digital Culture By Martin Lister

captured images are digitized and stored as a computer file ready for further digital processing, viewing, electronic publishing, or digital printing. Until the advent of such technology, photographs were made by exposing light sensitive photographic film and paper, which was processed in liquid chemical solutions to develop and
