From the bestselling coauthor of The Money and the Power, the "compelling corporate history" (The National Book Review) and inside story of the Bechtel family and the empire they've controlled since the construction of the Hoover Dam. The tale of the Bechtel family dynasty is a classic American business story. It begins with Warren A. "Dad" Bechtel, who led a consortium that constructed the Hoover Dam. They would go on to "build the world," from the construction of airports in Hong Kong and Doha, to pipelines and tunnels in Alaska and Europe, to mining and energy operations around the globe. In their century-long quest, five generations of Bechtel men have harnessed and distributed much of the planet's natural resources, including solar geothermal power. Bechtel is now one of the largest privately held corporations in the world. The Bechtel Group has eclipsed its few rivals, with developments in emerging and third world nations that include secret military installations and defense projects, underground bunkers in Kuwait, Iraq, and Afghanistan; oil pipelines and entire cities in the Middle East; palaces for Arab rulers, such as the Saudi Royal Family, and chemical plants for Arab dictators. Like all stories of empire building, the rise of Bechtel—one of the first mega companies to emerge in the American West—presents a complex and riveting narrative. Veiled in obsessive secrecy, Bechtel has had closer ties to the US government than any other private corporation in modern memory. "Riveting and revealing" (Kirkus Reviews), The Profiteers is one of the biggest business and political stories of our time.

A journalist takes an investigative look inside America's largest private company, The Bechtel Group, and at its connections with such officials as Ronald Reagan, George Schultz, and Caspar Weinberger

Las Vegas—the name evokes images of divorce and dice, gangsters and glitz. But beneath it all is a sordid history that is much more insidious and far-reaching than ever imagined. The Money and the Power is the most comprehensive look yet at Las Vegas and its breadth of influence. Based on five years of intensive research and interviewing, Sally Denton and Roger Morris reveal the city's historic network of links to Wall Street, international drug traffickers, and the CIA. In doing so, they expose the disturbing connections amongst politicians, businessmen, and the criminals that harness these illegal activities. Through this lucid and gripping indictment of Las Vegas, Morris and Denton uncover a national ethic of exploitation, violence, and greed, and provide a provocative reinterpretation of twentieth-century American history. Now this neon maelstrom of ruthlessness and greed stands to not as an aberrant "sin city," but as a natural outgrowth of the corruption and worship of money that have come to permeate American life.

When Kentucky Blueblood Drew Thornton parachuted to his death in September 1985—carrying thousands in cash and 150 pounds of cocaine—the gruesome end of his startling life blew open a scandal that reached to the most secret circles of the U.S. government. The story of Thornton and “The Company” he served, and the lone heroic fight of State Policeman Ralph Ross against an international web of corruption is one of the most portentous tales of the 20th century.

A portrait of the Broadway star and congresswoman covers her political achievements as a woman in male-dominated mid-20th-century arenas, her infamous rivalry with Richard Nixon, and her victimization by a McCarthyist smear campaign. By the award-winning author of Passion and Principle.

In the 1850s, Jean Rio, a deeply spiritual widow, was moved by the promises of Mormon missionaries and set out from England for Utah. Traveling across the Atlantic by steamer, up the Mississippi by riverboat, and westward by wagon, Rio kept a detailed diary of her extraordinary journey. In Faith and Betrayal, Sally Denton, an award-winning journalist and Rio's great-great-granddaughter, uses the long-lost diary to re-create Rio's experience. While she marvels at the great natural beauty of Utah, Rio's enthusiasm for her new life turns to disillusionment over Mormon polygamy and violence against nonbelievers, as well as the harshness of frontier life. She sets out for California, where she finds a new religion and the freedom she longed for. Unusually intimate and full of vivid detail, this is an absorbing story of a quintessential American pioneer.

Halliburton's Army is the first book to show, in shocking detail, how Halliburton really does business, in Iraq, and around the world. From its vital role as the logistical backbone of the U.S. occupation in Iraq—without Halliburton there could be no war or occupation—to its role in covering up gang-rape amongst its personnel in Baghdad, Halliburton's Army is a devastating bestiary of corporate malfeasance and political cronyism. Pratap Chatterjee—one of the world's leading authorities on corporate crime, fraud, and corruption—shows how Halliburton won and then lost its contracts in Iraq, what Dick Cheney and Donald Rumsfeld did for it, and who the company paid off in the U.S. Congress. He brings us inside the Pentagon meetings, where Cheney and Rumsfeld made the decision to send Halliburton to Iraq—as well as many other hot-spots, including Somalia, Yugoslavia, Uzbekistan, Afghanistan, Guantánamo Bay, and, most recently, New Orleans. He travels to Dubai, where Halliburton has recently moved its headquarters, and exposes the company's freewheeling ways: executives leading the high life, bribes, graft, skimming, offshore subsidiaries, and the whole arsenal of fraud. Finally, Chatterjee reveals the human costs of the privatization of American military affairs, which is sustained almost entirely by low-paid unskilled Third World workers who work in incredibly dangerous conditions without any labor protection. Halliburton's Army is a hair-raising exposé of one of the world's most lethal corporations, essential reading for anyone concerned about the nexus of private companies, government, and war
