RUP A Practitioners Guide To The Rup

Rational Unified Process (RUP) is an agile software development method, in which the life cycle of a project, or the development of software, is divided into four phases. Various activities take place during these phases: modelling, analysis and design, implementation, testing and application. The Rational Unified Process (RUP) is iterative, meaning repeating; and agile. Iterative because all of the process's core activities repeat throughout the project.

Rational Unified Process / RUP – software development ...

By Marios Alexandrou. The Rational Unified Process attempts to capture many of modern software development's best practices in a form suitable for a wide range of projects and organizations. This process recognizes that the traditional waterfall approach can be inefficient because it idles key team members for extended periods of time.
