Net income for the third quarter of 2019 included a one-time tax benefit of \$65.8 million related to the release of our valuation allowance. Adjusted net income was \$17.7 million for the third quarter of 2020, compared to \$17.0 million.

India is ageing. One response of Indian policy makers has been introduction of the New Pension Scheme (NPS), a defined contribution pension scheme which is mandatory for civil servants and voluntary for the rest of the population. Given the size of the target population, even if take-up is modest, NPS savings may soon provide huge amounts of capital to India's economy. However, challenges are abound. What governance structure will best achieve the ultimate policy goal of serving the needs of savers? What business processes and information technology design will serve members best? How effectively will the NPS attack the problem of old-age poverty? In this book, a multi-disciplinary international team, comprising of economists, lawyers, pension management experts, and capital market experts, explore these and other questions. The book proposes significant legal, regulatory, and governance reforms for the NPS and other existing pension schemes, as well. It finds that current NPS business practices cannot keep pace with potential growth of the system and makes suggestions on how to take better advantage of information technology. Based on review of experience elsewhere and state-of-the-art economic-demographic modelling, it warns that the NPS in its current form does not address the retirement income needs of the lifelong very poor, suggesting that it is only one in a range of responses needed to cope with the challenges of population ageing in India.

In its fourth edition, this report focuses on recent developments in Africa's banking sectors and the policy options for all stakeholders. The study of banking sectors across all African sub-regions includes the results of the EIB survey of banking groups operating in Africa. Three thematic chapters address challenges and opportunities for financing investment in Africa: Crowding out of private sector lending by public debt issuance The state of bank recovery and resolution laws in Africa Policy options on how to finance infrastructure development. The report finds that in many African banking markets, the last two years saw a pause in financial deepening. However, a rising share of banking groups report improving market conditions and plan a structural expansion of their operations in Africa and a continued push for new technologies.

A witty, psychedelic, and telling novel of the 1960s Richard Fariña evokes the Sixties as precisely, wittily, and poignantly as F. Scott Fitzgerald captured the Jazz Age. The hero, Gnostus Pappadopolis, weaves his way through the psychedelic landscape, encountering-among other things-mescaline, women, art, gluttony, falsehood, science, prayer, and, occasionally, truth. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators. From the Trade Paperback edition.

Countries around the world are increasingly relying on individual pension savings accounts to provide income in old age for their citizens. Although these funds have now been in place for several decades, their performance is usually measured using methods that are not meaningful in relation to this long-term objective. The recent global financial crisis has highlighted the need to develop better performance evaluation methods that are consistent with the retirement income objective of pension funds. Compiling research derived from a partnership among the World Bank, the Organisation for Economic Co-operation and Development (OECD), and three private partners, "Evaluating the Financial Performance of Pension Funds" discusses the theoretical basis and key implementation issues related to the design of performance benchmarks based on life-cycle savings and investment principles. The book begins with an evaluation of the financial performance of funded pension systems using the standard mean variance framework. It then provides a discussion of the limitations inherent to applying these methods to pension funds and outlines the many other issues that should be addressed in developing more useful and meaningful performance measures through the formulation of pension-specific benchmark portfolios. Practical implementation issues are addressed through empirical examples of how such benchmarks could be developed. The book concludes with commentary and observations from several noted pension experts about the need for a new approach to performance measurement and the impact of the recent global financial crisis on pension funds.

Examining innovative ways to address Africa's infrastructure deficit is at the heart of this analysis. Africa's infrastructure stock and quality is among the least developed in the world, a challenge that significantly hinders economic development. It is estimated that the finance required to raise infrastructure in Sub Saharan Africa (SSA) to a reasonable level within the next decade is at US\$93 billion per year, with two-thirds of this amount needed for capital expenditures. With the existing spending on infrastructure being estimated at US\$45 billion per annum and after accounting for potential efficiency gains that could amount to US\$17 billion, Africa's infrastructure funding gap remains around US\$31 billion a year. One approach to address this challenge is by facilitating the increase of private provision of public infrastructure services through public-private partnerships (PPPs). This approach, which is a relatively new arrangement in SSA is multifaceted and requires strong consensus and collaboration across both public and private sectors. There are several defined models of PPPs. Each type differs in terms of government participation levels, risk allocations, investment responsibilities, operational requirements, and incentives for operators. Our definition of PPPs assumes transactions where the private sector retains a considerable portion of commercial and financial risks associated with a project. In more descriptive terms, among the elements defining the notion of PPPs discussed in this study are: a long-term contract between a public and private sector party; the design, construction, financing, and operation of public infrastructure by the private sector; payment over the life of the PPP contract to the private sector party for the services delivered from the asset; and the facility remaining in public ownership or reverting to public sector ownership at the end of the PPP contract. The observations and policy recommendations that follow draw on ongoing World Bank Group PPP engagements in these countries, including extensive consultations with key public and private sector stakeholders involved in designing, financing, and implementing PPPs. The study is structured around the most inhibiting constraints to developing PPPs, as shared by all six countries.

Heart-pounding domestic suspense from an internationally-bestselling author – One morning Caitlin Eckhart receives a phone call that changes her life forever – her much-loved six-year-old stepson Geordie has disappeared from school. It soon becomes clear that someone must have deliberately taken him. Distraught, Caitlin and her husband, Noah, make an anguished public appeal for his return. But Caitlin has a secret from her past that is about to catch up with her, and as Geordie's continued absence brings her relationship with Noah to breaking point, she stands to lose everything that she loves.

This book explores the disturbing dimensions of the problem of insecurity in Nigeria, such as herdsmen violence, the Boko Haram insurgency, cybercrime, militancy in the Niger Delta, communal conflict and violence, as well as police corruption. It offers a comprehensive discussion of the theoretical foundations of internal security, the threats to internal security, the role of formal and informal agencies in internal security management and the challenges of internal security management.

Sue Grafton ups the ante for private investigator Kinsey Millhone like never before in this "taut, terrifying, transfixing" #1 New York Times bestselling mystery in the Alphabet series. Kinsey Millhone's elderly neighbor, Gus Wronsky, may have been the original inspiration for the term "Crumpy Gus." A miser and a hoarder, Gus is so crotchety that after he takes a bad fall, his only living relative is anxious to find someone to take care of him and get back home as soon as she can. To help, Kinsey runs a check on the applicant, Solana Rojas. Social security, driver's license, nursing certification: It all checks out. And it sounds like she did a good job for her former employers. So Kinsey gives her the thumbs-up, figuring Gus will be the ideal assignment for this diligent, experienced caregiver. And the real Solana Rojas was indeed an excellent caregiver. But the woman who has stolen her identity is not, and for her, Gus will be the ideal victim... "The best and strongest book in the series...Solana is one of the most evil, calculating characters Grafton has created."-USA Today

The Belgian insurance industry was adversely affected by the global financial crisis and continued to confront challenges related to legacy assets and economic uncertainties in Europe. The Belgian authorities have made significant progress in updating the insurance regulatory regime and supervisory practice. The updated regulatory framework has a high level of observance with the Insurance Core Principles (ICPs), supported by robust prudential supervision. The authorities are advised to review current conduct-of-business (COB) regulation and supervision to strengthen the protection for policyholders.
