This book collects and organizes the original studies presented at PROMS 2014 conference on theories and applications of Rasch model. It provides useful examples of the Rasch model used to address practical measurement problems across a range of different disciplines including: Item Response Theory (IRT), philosophy of measurement, dimensionality, the role of fit statistics and residuals, application, educational application, language testing, health related research, business and industrial application and Rasch-based computer software. PROMS 2014 (Pacific Rim Objective Measurement Symposium) was held August 2 – 6, 2014 in Guangzhou, China. The goal of this conference is to bring together the researchers from academia, universities, hospitals, industry, management sector as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of Rasch Model.

The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts/Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique (Grades 9-12) Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time, but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills: The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from “making inferences” to “reflecting critically.” Students focus on this set of twenty skills throughout the year and program, continually applying them in new and more sophisticated ways. Academic Habits: The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as “preparing” and “completing tasks” that are essential to students’ success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system, centered around the literacy skills and academic habits, allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.

Reviews subjects on the test, offers tips on test-taking strategies, and includes two full-length practice exams with answers and explanations.

IB ACIO Grade-II / Executive is considered as a premium job opportunity in Intelligence Bureau. This is the General Central Service, Group 'C' (Non-Gazetted, Nonminister) post. Ministry of Home Affairs (MHA) has released the recruitment notification for 2000 vacancies for the post of Intelligence Bureau Assistant Central Intelligence Grade-II. This book has been specially developed by Edugorilla for the Intelligence Bureau: ACIO (Grade-II / Executive) examination candidates. The book consisted of mock tests aimed at practicing questions based on the latest pattern of the exam. Detailed explanatory answers are also provided to the selected questions for better understanding of the mock test paper (solved) of the candidates.

Globalisation and National Identity in History Textbooks: The Russian Federation, the 16th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, discusses trends in dominant discourses of identity politics, and nation-building in school history textbooks in the Russian Federation (RF). The book addresses one of the most profound examples of the re-writing of history following a geo-political change. Various book chapters examine debates pertaining to national identity, patriotism, and the nation-building process. The book discusses the way in which a new sense of patriotism and nationalism is documented in prescribed Russian history textbooks, and in the Russian media debate on history textbooks. It explores the ambivalent and problematic relationship between the state, globalisation and the construction of cultural identity in prescribed school history textbooks. By focusing on ideology, identity politics, and nation-building, the book examines history teachers’ responses to the content of history textbooks and how teachers depict key moments in modern Russian history. This book, an essential sourcebook of ideas for researchers, practitioners and policymakers in the fields of globalisation and history education, provides timely information on history teachers’ attitudes towards historical knowledge and historical understanding in prescribed Russian history textbooks.

Meningiomas, Volume 170, Part Two, discusses tumors that arise from the coverings of the brain and spinal cord. In this updated volume of the Handbook of Clinical Neurology, experts in the field - from basic scientists to skilled neurosurgeons, provide up-to-date synopses of each topic as it relates directly to this class of tumor. Surgical and radiation therapy, which remain the mainstays of treatment, are a major focus, but coverage also includes potential molecular avenues for the development of effective medical treatments. This book serves as a comprehensive review of the neurosurgical issues surrounding this extremely common brain tumor. Few procedures in surgery are more immediately formidable than an attack upon a large tumor of this type, hence the greatest challenge of treatment is the need to complete tumor removal without creating new neurologic deficit. Provides current reviews of neurosurgical issues, such as endoscopic surgery, molecular biology of meningiomas, and the role of different radiation oncology treatment modalities and drug therapies Addresses multiple patient populations – children, elderly and those with multiple or radiation-induced tumor Offers a strong focus on anatomy and surgical approaches Edited work featuring leaders in neurosurgery and neuro-oncology around the globe – the broadest, most expert coverage available

Delhi Subordinate Services Selection Board (DSSSB) is a board that conducts recruitment exams for various posts under the departments of Government of national Capital Territory of Delhi. Which takes care of the needs of employees in the NCT Delhi. DSSSB will recruit candidates for the post of Grade- Delhi Administration Subordinate Service (DASS) II .
