As the MinutePhysics video above explains, there are three easy ways to time travel. The first is by doing nothing, because we're all travelling in time, from the past to the future. The funny thing is, no one's actually sure why that is - the physical laws of the Universe give zero fucks about whether time moves forwards or time moves backwards. But anyway, that's boring time travel, because it's not special if everyone's doing it.

Concept of moving between different points in time. Time travel is the concept of movement between certain points in time, analogous to movement between different points in space by an object or a person, typically with the use of a hypothetical device known as a time machine. Time travel is a widely recognized concept in philosophy and fiction. The idea of a time machine was popularized by H. G. Wells 's 1895 novel The Time Machine.
