Many papers have a submitted (and later published) conference version, along with a "full paper" technical report on the web. It's important to manage versions carefully, both in content and proliferation. My recommendation is, whenever possible, for the full paper to consist of simply the conference version plus appendices.

Technical writing is informative prose concerning mechanical or scientific subject matter. The contents of good technical writing has not changed throughout the years, but the methods by which we convey this subject matter has changed as a result of the computer and the Internet. Technical writing must be clear, concise, correct, and complete. This text conveys the procedures writers need to follow to meet the goal of good technical writing-- to allow each reader to receive the same meaning from a piece of writing.

A listing of 95 Sandia Corporation papers relating to product reliability is presented. Most of the listed publications were made available to the public under the Civilian Applications Program of the AEC. Information on how to obtain the papers is included. (J.R.D.).
