This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

This is a coloring book that teaches children how to turn negative situations into positive ones. The messages are reinforced through the fun activity of coloring with crayons or markers.

Before use, standard ERP systems such as SAP R/3 need to be customized to meet the concrete requirements of the individual enterprise. This book provides an overview of the process models, methods, and tools offered by SAP and its partners to support this complex and time-consuming process. It begins by characterizing the foundations of the latest ERP systems from both a conceptual and technical viewpoint, whereby the most important components and functions of SAP R/3 are described. The main part of the book then goes on to present the current methods and tools for the R/3 implementation based on newer process models (roadmaps).

Learn to paint 25 stunning watercolours using only three colours and only three brushes each time. Learn to paint colourful watercolours using only three colours in this collection of projects, tips and techniques from the innovative Take Three Colours... series. Each of the twenty-five projects explores a variety of watercolour techniques and walks the reader through a sequence of clear steps using a selection of three pure colours and their many mixes, and only three brushes to complete the work. Guidelines are also provided to show the reader how to trace off the outline for each scene, and how to get the most out of their mixes for an impactful painting.
