International debate has recently focused on increased inequalities and the adverse effects they may have on both social and economic developments. Income inequality, now at its highest level for the past half-century, may not only undermine the sustainability of European social policy but also put at risk Europe's sustainable recovery. A common feature of recent reports on inequality (ILO, OECD, IMF, 2015–17) is their recognition that the causes emerge from mechanisms in the world of work. The purpose of this book is to investigate the possible role of industrial relations, and labour policies more generally, in reducing these inequalities.
