An investor should not turn himself into a speculator, for a speculator acts on his instincts rather than his intellect when executing trades. The stock market is neither a mythical place beyond human understanding nor a place reserved for people with special genetics. The investors who have made a fortune out of stock market are average people like everyone else except they took their time to understand everything before trying to get in the game. There are many investments in the securities markets beyond stocks. You could invest in bonds and funds like mutual funds and index funds. Investing in IPOs gives you a chance to own a slice of a company and in return, you play your part in providing the company with much-needed resources. The best single thing an investor can do before taking up an investment deal is to conduct a fundamental analysis. Fundamental analysis is the evaluation of a company's financial health with the intention of either solidifying your interest in the venture or finding out any red flag. The strategies for succeeding as an investor are timeless. They worked a lifetime ago in the days of Ben Graham (the father of value investing) and they still work today.
