For a handheld sized device, I think it works great. The keys are raised and my large hands and meaty fingers had no problems with the keyboard. I did a typing test on the 8830, after having it for a week, and I scored the same as a regular sized keyboard. there are shortcuts to help the user with increasing their speed of use on the key board.

I was able to sync it via a lan cable, but wireless still would not work. One issue was the send as perms on a user had been removed probably by a MS update or so says BB. Also the phone ended up not being provisioned by verizon for use on a bes server. I am so angry at verizon and the yahoos that work there.
