This book of "Seed Spices" is the concise compilation of scientific information in a bridged form on seed spices production technologies. The book has been divided in to fourteen chapters covering all the cultivation aspects of major and minor seed spices. The efforts have been made to incorporate latest production, protection and postharvest technologies of seed spices developed and generated at ICAR-NRCSS, Ajmer and other research and development organization working under the umbrella of AICRP on spices. It is hoped that the book will be of interest and benefit the researchers, students, development workers, teachers, policy makers, and all interested in seed spices.

Theatres of Independence is the first comprehensive study of drama, theatre, and urban performance in post-independence India. Combining theatre history with theoretical analysis and literary interpretation, Aparna Dharwadker examines the unprecedented conditions for writing and performance that the experience of new nationhood created in a dozen major Indian languages and offers detailed discussions of the major plays, playwrights, directors, dramatic genres, and theories of drama that have made the contemporary Indian stage a vital part of postcolonial and world theatre.The first part of Dharwadker's study deals with the new dramatic canon that emerged after 1950 and the variety of ways in which plays are written, produced, translated, circulated, and received in a multi-lingual national culture. The second part traces the formation of significant postcolonial dramatic genres from their origins in myth, history, folk narrative, sociopolitical experience, and the intertextual connections between Indian, European, British, and American drama. The book's ten appendixes collect extensive documentation of the work of leading playwrights and directors, as well as a record of the contemporary multilingual performance histories of major Indian, Western, and non-Western plays from all periods and genres. Treating drama and theatre as strategically interrelated activities, the study makes post-independence Indian theatre visible as a multifaceted critical subject to scholars of modern drama, comparative theatre, theatre history, and the new national and postcolonial literatures.

Handbook of Energy Efficiency in Buildings: A Life Cycle Approach offers a comprehensive and in-depth coverage of the subject with a further focus on the Life Cycle. The editors, renowned academics, invited a diverse group of researchers to develop original chapters for the book and managed to well integrate all contributions in a consistent volume. Sections cover the role of the building sector on energy consumption and greenhouse gas emissions, international technical standards, laws and regulations, building energy efficiency and zero energy consumption buildings, the life cycle assessment of buildings, from construction to decommissioning, and other timely topics. The multidisciplinary approach to the subject makes it valuable for researchers and industry based Civil, Construction, and Architectural Engineers. Researchers in related fields as built environment, energy and sustainability at an urban scale will also benefit from the books integrated perspective. Presents a complete and thorough coverage of energy efficiency in buildings Provides an integrated approach to all the different elements that impact energy efficiency Contains coverage of worldwide regulation

Having seen a depressed polar bear in the zoo, Grandfather and his dog, Roo, set off on an expedition to find the last polar bears. After a treacherous journey on HMS Unsinkable, they reach Walrus Bay and the fun really starts. Howling wolves and terible snowstorms delay the start of their trek and when they're on the way their tent is blown away by the fierce winds. They struggle on, hungry and cold to the top of Great Bear Ridge where they see the polar bears at last.
