I'm fortunate to work at an unnamed national severe weather forecasting center that serves as one of the last bastions of frequent manual map analysis in the nation. Twice a day, the mandatory level (925, 850, 700, 500 and 250 mb) upper air charts appear from printers on 11" x 17" paper for analysis in support of the core forecast mission.

Weather Maps

Weather reports & Map analysis Surface weather charts summarize weather con-ditions that can affect your life. Where is it rain-ing, snowing, windy, hot or humid? More than just plots of raw weather reports, you can analyze maps to highlight key features including airmasses, cen-ters of low- and high-pressure, and fronts (Fig. 9.1).

Over time, weather sensors can degrade and fail to measure accurately or precisely. Regular "calibration" of most sensors is needed in order to retain high-quality data collection. The NYSM Calibration Laboratory enables accurate, rapid testing and calibration of sensors without the need for outsourcing, thereby saving time and money.
