What sets this book apart from other astrology titles is Kriyananda's focus on the spiritual potential of each sun sign, rather than

focusing mainly on the karmic limitations. It is so common to hear generalizations such as: Leo is proud, and Taurus is stubborn. In his book Kriyananda shows how, with awareness, attention, and will, one can cultivate the higher potential of his sign, leading to greater fulfillment and success. Leo can shine as a channel of light and creativity, without pride, if he remembers that Spirit (not ego) is the doer. Taurus can be the essence of loyalty and perseverance, without being stubborn, if he develops an inner fixity of purpose while practicing an outward flexibility. In other words, the horoscope shows karmic patterns of energy. We can learn to work with these energies and develop their more refined, higher octaves, which will then magnetize new possibilities into our lives. The fundamental point is that the horoscope shows one's karmic energy situation, but not who he really is—the spiritual Self within.

Kriyananda's approach is to encourage and inspire one's Self to awaken, and to express itself through the sun sign. Within each of us is vast potential to be awakened. Your Sun Sign as a Spiritual Guide is a beautifully inspiring book that will open doors and encourage one in this direction. This book also guides the seeker to an understanding of the subtle aspects of the spiritual path as it manifests for him through his particular sun sign. Yogic understanding is rich and often runs counter to prevailing thought. So too with astrology, the reader will find vistas of understanding opening as he takes the words and guidance of this yogic view of astrology to heart. This book reassures the reader that sun-sign weaknesses can be spiritual strengths if pursued rightly. It also warns one not to rest on the laurels of sun-sign strengths, but to go much deeper. Concentrated, deep wisdom is available to the seeker in this brief, easy-to-digest book that helps the reader to understand himself and others from a higher perspective.

Astronomers discarded first hand visual observations, because each observer measured a star's transit as occurring at a different time. Physicists soon followed them, so that now instrumental

measurements are the only data that physics and astronomy accept. The theory of evolution followed them in that physicalist mode by accounting only for the physical survival of organisms. That is why their sciences deny the existence of anything of a spiritual nature. This little book examines their theorized big bang beginning, and the physicalist theory of evolution, in the light of the newly measured human consciousness, through whose thinking processes both of those sciences arose. Spiritual humanism aims to provide a nondogmatic faith in humanity, and in principles which place human beings, their values, their thinking, and their enspirited consciousnesses as central to creating all of our sciences. The spiritual aspect arises especially from our consciousness which allows us to reflect upon what is in our awareness. The qualities of our awarenesses and consciousness are explained by the anthropomorphic theory of human perception which attributes human qualities even to our senses. The book suggests that consciousness places us in a realm of being beyond the physical. Though our physical brains are proposed as the basis for that consciousness, the outcome in consciousness creates a spiritual quality in human beings. Spiritual humanism, accordingly, is concerned with human beings, and is centered entirely in this human world rather than in any other. Thus a non dogmatic spiritual humanism for fostering the potentialities in human beings in this world is what this little book means to provide. The experiences of the young Helen Keller show how consciousness becomes the basis for disinterested interests: the ability to be deeply engrossed in something unrelated to our own self interest. That disinterested interest, is what lies behind our engagements with the arts, the sciences and our religious aspirations. The assumption of an entirely physical origin for the physicists' theoretical big bang along with Darwin's physicalist theory of evolution are criticized, because both methodologies preclude finding anything of the spirit. A reinterpretation of what follows from these critiques, and the positive formulation of the humanist science of anthropomorphic

optics and its implications, are what the book provides.

This book is composed of articles by several authors, who worked in the scientific-spiritual School of Vladimir Antonov. The main methodological advantage of this School is the development of its students as spiritual hearts, which allows them to walk the Straight Path - to realization of God's Precepts, to spiritual Perfection. The methods of the School are presented as a sequence of steps: starting from most simple, basic - to more complex, advanced. In this book the authors give methodological recommendations and modifications of the basic methods adapted to children and adolescents. The main priorities of this program are the following: laying the foundation for a spiritual attitude (that is based on love) towards other people and all living beings, developing the skills necessary for a healthy lifestyle, expanding the horizons and learning the basic ideas about the meaning of our lives on the Earth. This book is intended for teachers working with children of different ages. It can be useful to parents as well.

Roger S. Gottlieb provides a lucid and accessible overview of what spirituality is, enabling a clear-eyed understanding of the concept, its manifold connections to other aspects of personal and social life, its role as a positive psychological and social phenomenon, and some of the risks that attend it.

With this book, I wanted to give at least a glimmer of joy to my eternally tormented country, which for decades has been so preciously owed by the freedom gained through its blood. I wanted to introduce to the English-speaking world how a Georgian person thinks, primarily a Georgian poet, who are so numerous in Georgia.

And poetry, after all, it is a bridge between people's hearts. Then, walk on this bridge and connect our desires, kind people!

Ceremony as therapy Formal ceremonies seem to be universal in human experience, addressing something very deep and basic in the human psyche. They tap into that vast subconscious reservoir of wisdom and strength that every human being possesses. To these qualities ceremonies add their own understandings of life and of God. They emphasize the presence of God in all things. The important transitions in our lives inevitably create anxiety—even happy transitions, such as weddings. We move from the familiar to the unknown. Our role in the community may change, which means that we will be treated differently. Sometimes it is our own sense of who we are that changes. We seek to live differently. All of these changes have an anxiety of their own. Ceremonies use the “languages” of the heart—metaphor, poetry, meditation, music, liturgy, and drama—to address those anxieties. Bypassing the sterility of logic and analysis, a ceremony evokes the power to affirm and to heal that straightforward rational communication cannot touch. A ceremony has the quality of set-apartness. Something special is happening! Words spoken in a ceremony will have much more impact than those same words would have in a more ordinary context. A ceremony brings new perspective to things with which we struggle. Many ceremonies enlist the support of one's community. The leader often represents one's spiritual tradition, and other members of the community may be present. Even if the ceremony is done in the privacy of one's home or of a therapist's or pastor's office, others are present in the participant's imagination. Ceremonies also involve God, whose presence is acknowledged and whose blessing and support are assured. The ceremonies presented here are down-to-earth and practical. They can easily be adapted to many situations, and can stimulate the reader to create his/her own ceremonies to meet the unique needs of the persons to whom he/she ministers. Some of the ceremonies in this book are for use in a

public place: weddings funerals a ceremony for grieving Others are more private, for use in a pastor's/therapist's office or in one's home: adoption funeral for an aborted baby support for a rape survivor the commitment to stop smoking addressing children's phobias leaving home forgiving another person forgiving oneself and more This book is a first! Not just a discussion about ceremonies, but a collection of ceremonies addressing a wide variety of situations! It will be innovative and insightful reading for pastors, therapists, and others for whom the "languages" of analysis and logic are not enough.
