Why We Sleep: The New Science of Sleep and Dreams is a popular science book about sleep by the neuroscientist and sleep researcher, Matthew Walker. Walker is a professor of neuroscience and psychology and the director of the Center for Human Sleep Science at the University of California, Berkeley .

~~Why We Sleep - Wikipedia~~

Two factors here are circadian rhythm and sleep pressure. In older folk, the circadian rhythm shifts so that melatonin is released earlier in the evening, signaling that it's time to sleep. Second, we experience "sleep pressure" caused by the build-up of the chemical adenosine in our brains.

~~The Work We Do While We Sleep | The New Yorker~~

Sleep is an essential function 1 that allows your body and mind to recharge, leaving you refreshed and alert when you wake up. Healthy sleep also helps the body remain healthy and stave off diseases. Without enough sleep, the brain cannot function properly. This can impair your abilities 2 to concentrate, think clearly, and process memories.
