UL is your global partner for wire and cable testing for safety, compliance, performance, quality, and reliability. UL supports your drive to enhance product quality and safety, access global markets and clearly differentiate your products in the marketplace. Our customer-centric service offerings include the rigorous assessments that manufacturers, installers, brand owners, retailers, regulatory bodies and consumers have come to expect from UL.

Wire and Cable Testing and Certification Services | UL

The UL Mark appearing on the coil, reel, flange, or box is the only means to identify wire/cable covered under UL certification and Follow-Up Service. The UL symbol or letters "UL" surface printed on the wire/cable is only a supplemental method of marking the product and should not be considered as evidence of UL coverage.

Wire and Cable - UL Code Authorities

The UL Mark appearing on the coil, reel, flange, or box is the only means to identify wire/cable covered under UL certification and Follow-Up Service. The UL symbol or letters "UL" surface printed on the wire/cable is only a supplemental method of marking the product and should not be considered as evidence of UL coverage.

Wire and Cable - UL

UL or Underwriters Laboratories, is an independent, non-profit global safety certification company and testing laboratory headquartered in Northbrook, IL. UL conducts safety and quality tests on a broad range of products including more than 70 different wire and cable product categories to national and international standards for safety, performance, quality, environmental impact and regulatory compliance.

Understanding UL Listed vs. UL Recognized for Wire and Cable

In addition to the IEC standards, the new Acid Gas 14 (AG14) Mark has been developed. All nonmetallic compounds and components contained in the wire or cable construction are evaluated to the Acid Gas Emission test in accordance to UL 2556. Benefits. Cable designers can use one set of requirements for their designs that can be sold and applied around the world and do not rely on self-declaration/certification. Even more importantly, the end user has clarity as to what requirements apply. Why UL

Green Wire and Cable Certification Programs | UL

Overview. Our customer-centric service offerings include the rigorous assessments that manufacturers, installers, brand owners, retailers, regulatory bodies and consumers have come to expect from UL. We evaluate over 70 different wire and cable product categories to national and international standards for safety, performance, quality, environmental impact and regulatory compliance as required for markets in Latin America, North America, Europe, Asia and Middle East.

Wire and Cable | UL LATAM

PUR (Polyurethane) can be and is used as a cable jacketing compound on UL listed cables that pass the UL Large Scale Cable Flame Test (bundled fire test). for applications such as industrial equipment and machinery, UL1277 (Power and control tray cable), UL13 (Power limited circuit cables (PLTC, CL2, CL3)) and UL2277 (Flexible motor supply caable) are typically much more relevant standards than UL 444 (CM).

About EUROPAGES. EUROPAGES is a European B2B platform available in 26 linguistic versions. With 3 million listed companies, mainly manufacturers, wholesalers, distributors and service providers, every month EUROPAGES attracts more than 2 million decision-makers searching for business partners, suppliers or service providers in Europe and worldwide.

This report reviews the current market with reference to the polymers in use and the remedial measures being undertaken by polymer manufacturers and cable companies. The main sections provide an overview of polymer use by material with the main end-use markets examined. Key trends based on new products, processes and machinery developments are indicated. The report includes profiles of leading polymer and cable companies with discussion about recent merger and acquisition activity.

Provides detailed technical information on the properties, standards, specifications, and maintenance of wires and cables for electronic equipment

This book provides an overview of the technical and commercial considerations regarding the viability of copper for engineering applications. Further, this work presents representative numerical data selected from the scientific literature as well as data collected from industrial sources from around the world.

Presents the latest electrical regulation code that is applicable for electrical wiring and equipment installation for all buildings, covering emergency situations, owner liability, and procedures for ensuring public and workplace safety.

This volume addresses the state of the art in fire retardancy studies and the need for fire retardant chemicals and fire-retarded polymers, while considering the interrelationship among polymer degradation, fire retardant efficacy, fire testing and environmental concerns. The work examines the principles of polymer science with respect to fire retardancy.

FROM THE INTRODUCTION "Considerable effort has gone into the study of various aspects of flammability and of various plastic materials, so that these materials which are proving so useful to man will always be used in ways which will not compromise his safety. The task is a continuing one, because the family of plastics continues to grow, and, along with it, its variety of applications. Some of these future applications cannot even be conceived of at the present time. The needs of man and his society are changing, and with them the factors that affect his safety, comfort, and convenience. A flammability handbook for plastics must necessarily involve a variety of sciences and technologies spread across the whole spectrum of human knowledge, and it is impossible to discuss all the subjects in great depth. Any details extracted for attention are brought because they are believed to be significant to the overall effort to make plastics as useful and safe as humanly possible."

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.
